LEDON

A family-owned company for three generations

When Leo Donbæk founded LEDON in 1969, he was driven by a desire to make a difference: He wanted to create fun and stimulating high-quality playgrounds that stood the test of time and where safety was second-to-none.

Since 1984, Leo and his son Tom Donbæk have developed and technically transformed production so that now all the playground equipment supplied by LEDON is manufactured using technical programs, software and CNC machines. Craftsmanship and quality are still of paramount importance, and all details are meticulously cut by hand, and all product assembly is also performed by hand.

Today, LEDON is run and developed by Tom and the third generation of the family, his daughter Simone, who joined the family business in 2012. Simone, who heads the sales and marketing department on a daily basis, has an ambition to continue LEDON in the same spirit as her grandfather when he established the company more than 50 years ago.

Sharing the same passion and ambition

We are three generations of the same family, and we are all driven by the same passion and ambition: We want to create the best play experiences for children, we want to make their dreams come true, and we want to do so in the right way. This takes dedicated employees, extensive know-how and an optimised and high-quality production line. Therefore, all of LEDON's production takes place in Denmark, where we have quality-controlled production facilities for manufacturing products that help children around the world experience the joy of play.

Why play?

All our play equipment is produced in Denmark and sold in more than 40 different countries.

Play is essential for human development and for becoming an active member of society.

By creating play equipment together with children and experts, we develop play experiences that both support and contribute to children's development.

Values

Play value

We create play experiences that are inherently playful. Experiences that awaken children's imagination and which encourage them to develop. It is the value of playing that drives us. The play value of our products is always tested by children, and the results decide the composition of our play environments.

Quality and safety

Quality and safety are prerequisites for good play experiences. We use the best materials, assemble the components by hand and maintain strict quality control. Our products are approved according to the European EN 1176 standard and are certified by TÜV SÜD.

Sustainability

Our focus is children. In addition to giving them the best possible play experiences, we are dedicated to passing on a better world to them. We do so by thinking sustainably. For example, our polyethylene boards are largely made from recycled plastic.

Know-how

At LEDON, we have been creating play experiences for children for 50 years. We know what it takes, because we understand children and possess extensive knowledge about child development. We know how to design playgrounds to ensure the highest possible levels of play value, durability and safety.

Advice & guidance

There are many things to consider when planning to buy new playground equipment. Which equipment matches your needs, how much space is required, and what sort of safety surface do you need etc.? We help find the perfect solution to suit your requirements and budget.

Co-creation

Our play environments support play in every detail. We collaborate with children during the entire development phase to ensure we are creating play experiences for them – in terms of their play, learning and development.

Product development together with children

The children are a part of the entire development process, right from sketches and prototypes to finished play activities.

A child-centred approach guarantees the best play experiences

We take a child-centred approach to designing play products because we know children are the ultimate creators of play. Therefore, we invite children into the design process, and allow them to use their imagination to initiate play and, not least, develop it further. We don't just use children to test and validate our products, but also as active co-creators throughout the entire playground design process.

Our design work and innovation activities are child-centred, because children are creative by nature, and because their mindset is usually not as constrained as that of adults. By involving children in our development work, we receive input, inspiration and ideas far beyond what we could have come up with ourselves. This can lead to questions being answered that we didn't even know needed asking, and which can contribute to some of the most valuable and innovative knowledge in a development process.

The children's expert knowledge within play points us in new directions we could not imagine ourselves.

Children are play experts

We use elements from the designer's toolkit to explore and test solutions through prototypes and co-creation sessions with children. We play with children to learn, and because we are curious about why they do what they do and how they interact with the world around them. This gives us direct insights into the universe for which we are designing. In this way, we ensure that our playground equipment designs are not based on our own assumptions about children and their lives, but on real children and how they experience the world.

We make children's dreams come true

A child-centred approach not only helps to ensure that we end up with the best possible equipment, but also lays the foundations for the best possible play experiences. Play equipment only encourages play if it is used – which is why it is crucial that it is interesting and relevant for children. It must stimulate their natural curiosity, enquiring nature and creativity, and strengthen and support their natural development.

We recognise that children are experts at play, and that it is collectively that we can create the best play experiences. In a slightly broader perspective, we are seeking to design a better world, where we make children's dreams come true and support their development through play.

The play experience is best when the children's curiosity and interest is aroused.

” We use the value flower, because we believe that the good playground is made up from all five elements.

Value flower

Through play, children acquire important skills. Play trains children in many aspects of human life, and play gives them an important foundation for being able to develop into responsible citizens.

To ensure that our playground equipment and play environments support children’s development in the best possible way, we base our work on what we call the ‘value flower’.

This is scientifically based, and defines five areas in which children can develop through play.

Each item of play equipment usually addresses one or more of these development areas, and the playground as a whole should cater for them all. This requires that the play equipment is carefully designed.

We use the value flower because we believe that good playgrounds contain all five elements. Through being aware of the various development areas, we ensure that all five leaves in the value flower come into play. Ultimately, this means that the playground supports the child’s natural development in the most appropriate way.

Creative development

Encourages children to be experimental and creative through their play and imagination. Creative development is important for seeing things in context as well as seeing them in new ways.

Physical development

Children are stimulated into actively using their entire body through play and movement. In particular, balance and gross and fine motor skills are challenged. All are vitally important for a child’s development.

Emotional development

Children learn to understand and manage their emotions, and thereby develop a sense of empathy which is essential for being able to interact socially and understand other people.

Cognitive development

The children’s cognitive development is stimulated through play where thinking, language, problem-solving and so much more are tried and learned. Through play, the child forms a coherent picture of the world and what it means to become engaged in it as a contributing citizen.

Social development

Through play, children learn to interact with and respect each other and abide by the social rules, including making compromises, negotiating and resolving conflicts. Most importantly, the child gains experience and practice at being with others, which supports basic communication and social skills.

Danish design and production

Since Leo Donbæk founded LEDON more than 50 years ago, Danish craftsmanship and high quality have always been our top priority. Today, we are proud to supply Danish quality products in attractive and modern designs that appeal to children and the young at heart.

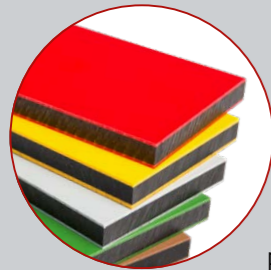

Our production facilities are located in Denmark, and we therefore guarantee that you always receive true LEDON quality, which means that the equipment is assembled by hand and meticulously checked before leaving our factory.

LEDON is your guarantee of Danish-designed playground equipment built to high standards of craftsmanship.

Materials

A synergy of safety and functionality ...

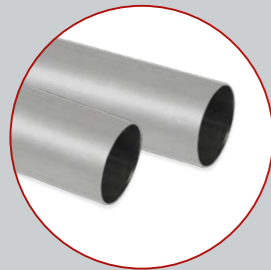

Polyethylene

All polyethylene boards have been specially developed for LEDON to ensure the highest possible quality. The material is

low-maintenance and extremely hard-wearing – and it also has a black core made from recycled plastic. We recycle all waste material from our polyethylene boards to ensure our production is as sustainable as possible.

The boards are non-toxic and comply with the European EN 71 standard (toy safety testing directive), parts 1-3. Moreover, the boards also comply with the requirements of the U.S. Food and Drug Administration as set out in the Code of Federal Regulations (CFR), Title 21, Section 177.1520 for olefin polymers.

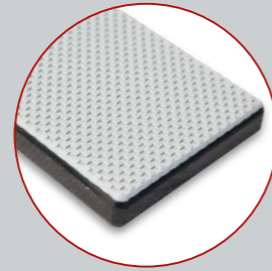

We supply polyethylene boards in 11 different colours with a black core. Both the materials and colours of the boards are UV-stabilised, so we are able to provide a five-year guarantee against significant fading.

Metal posts

All metal posts are hot-dip galvanised to prevent corrosion.

Metal pipes make a very stable construction and do not deform.

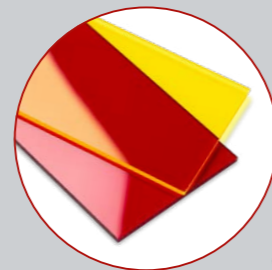

Non-slip polyethylene

The non-slip safe-tec polyethylene board is coated with 3 mm cubic grain rubber. The specially designed cubic grain pattern ensures the best grip, even in rain and frosty weather. The non-slip safe-tec panels are used for all LEDON's seats and floors.

Fibre parts – nylon

All fibre parts are made of nylon (PA6) to prevent fingers sticking in freezing conditions. The handles are rounded and shaped to provide a good grip, which minimizes the risk of eye and dental injuries. All parts are low-maintenance, and both the raw materials and colours are UV-stabilised to prevent fading. The fibre parts are thus impact-resistant at temperatures ranging from -40°C and +100°C.

Transparent polycarbonate

The transparent domes and windows are made of transparent polycarbonate. Polycarbonate is extremely impact-resistant at temperatures between -40°C and +120°C, which basically means that it is unbreakable. The material is UV-protected, so that the wind and weather do not affect its appearance, nor will the board fade despite being exposed to many hours of sunlight.

Ropes and nets

All ropes and nets are made of Taifun combination rope with six strands with eight steel strands in each – i.e. a total of 48 steel wires. This provides a tensile strength of 4500 kg, and the rope is therefore highly resistant to vandalism. The rope does not rot, and will also not stretch with use.

All climbing nets are put together with joints of impact-proof nylon (PA6).

Nut covers

All our nuts and bolt ends are capped with nut covers to protect children from sharp edges and the playground equipment against unwanted dismantling.

Like LEDON's other fibre parts, the nut covers are made of nylon (PA6), so that they do not fade in the sunlight and are impact-resistant at temperatures ranging from -40°C to +100°C.

Bolts and nuts

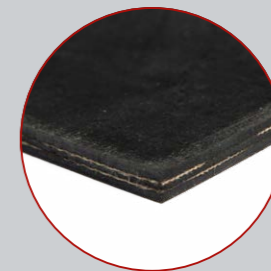

All the play equipment is assembled with low-maintenance bolts, locking nuts and specially designed aluminium bushings.

This ensures the strongest construction, one which requires no maintenance or tightening-up. All bolts are made of hot-dip galvanised or stainless steel.

Fittings

All fittings are hot-dip galvanised to prevent corrosion. The fittings are designed with rounded edges, so that children can play safely and securely without cutting or scratching themselves on sharp edges.

Rubber

In addition to guaranteeing many hours of fun, the rubber membrane incorporates several layers of microfibre that make it extremely hard-wearing while protecting the play equipment from vandalism.

Springs

LEDON's springs are made of 18 mm special steel that can be bent in all directions. After the coiling process, the springs are treated with zinc and phosphorus and then covered with an impact-proof polyester lacquer.

The springs are made so no fingers will be pinched, and our patented spring fixing with self-locking nuts allow for the spring to be fixed at one point only in each end. This ensures a long operating life with a very low risk of a breaking spring. The springs are delivered with a cover for the bottom part.

High-quality, low-maintenance materials

Warranties & certification

20 year warranty

- HDPE panel parts
- Steel posts and top beams
- Steel floor beams and frames
- Other galvanised structural parts
- Stainless-steel components

5 year warranty

- Painted metal parts
- Springs
- Ropes and nets
- Transparent polycarbonate domes and windows
- Rotation-moulded PE tube slide tubes

10 year warranty

- Other galvanised fittings
- Injection-moulded components
- PE and PA6 components

2 year warranty

- Movable metal and plastic parts

All products approved according to EN 1176

At LEDON, safety has a high priority, and therefore all our play equipment is, of course, checked and approved in accordance with the European EN 1176-2018 standard.

Certification is carried out by TÜV SÜD. TÜV approval is given for products which comply with strict requirements for safety, reliability and quality.

Themes

The magic of play

Play possesses a magical power that enables us as human beings to develop and acquire new skills and help us to become active members of society. In LEDON's theme series, we create an environment in which children can live out their imagination and explore the magic of play. Through play, the child acquires experiences and the skills they need throughout their lives – so there's much more to play than meets the eye. Therefore, the themed play systems have also been developed in partnership with the real play experts – children. In this way, we guarantee play experiences that provide the best opportunities for children's play and development.

No compromises have been made with children's play – and nor with quality or safety. Therefore, all the series are made of 100% recyclable materials which require very little maintenance. All the products are approved in accordance with the European EN 1176 standard and are certified by TÜV SÜD. This is your guarantee that children using the equipment will be perfectly safe.

Welcome to LEDON's themed play systems – we make children's dreams come true ❤️

MiniPlay LEDON

MiniPlay creates learning environments that support children's well-being, learning, development and education. In designing the series, the focus has been on incorporating age-appropriate activities and features for children aged 0-4 years old.

18

Pirates LEDON

You're on unsteady ground when the pirate ships set sail towards the Seven Seas. Pirate ships, treasure islands and ferocious crocodiles provide the backdrop to vivid seafaring tales filled with play and imagination for children aged 2-8 years.

22

Explore LEDON

The off-roader whizzes through the jungle, the monkeys swing from the vines, while giraffes and elephants keep watch over the savannah. Embark on a journey of discovery and explore a whole new world with jungle huts, rope tunnels and thrilling slides for children aged 2-8 years.

28

LEDON CASTLE

The knight's shield gleams among the ruby-coloured roofs, while torches cast colourful shadows across the suspension bridge. It takes courage, strength and, above all, an element of shrewdness to move around LEDON Castle. All princes and princesses aged 2-6 years are welcome.

36

LEDON BASIC

LEDON Basic is a competitively priced series of play equipment in an urban and timeless design which requires a minimum of maintenance. In designing the series, one particular focus area was supporting the basic elements of children's physical and motor development in the 2-12-year-old age group.

42

LEDON Originals

LEDON Originals pays homage to the favourite items of playground equipment which have been bestsellers for decades. All the popular playground equipment which is still a must when children aged 2-10 years are having fun in the playground.

46

Welcome to the world of the youngest children

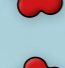

MiniPlay **LEDON**

LEDON MiniPlay is designed for children, with a host of features and striking colours to spark their curiosity.

In MiniPlay, play is central to creating learning environments that support children's well-being, learning, development and education. One of the main strengths of the series is the play-based activities that stimulate gross and fine motor skills and cross-coordination, linguistic, social and emotional development as well as logical and abstract thinking.

LEDON MiniPlay has been developed with particular focus on age-appropriate activities and motor skills for children aged 0-4 years. All the activities in the series have been carefully developed and tested in close collaboration with children and childcare professionals, including occupational therapists and physiotherapists.

Why choose LEDON MiniPlay?

-  LEDON MiniPlay has been specifically designed for children aged 0-4 years.
-  Developed in close collaboration with experts, for example childcare professionals and physiotherapists.
-  Can be installed directly on grass.
-  Height-designed to enable adults support the child in play.
-  MiniPlay systems are available in different sizes and price ranges according to your needs.

Welcome to the world of the pirates

Ahoy! Stab me, shiver my timbers, welcome on board Alexandrina!

Life on the ship is on unsteady ground. Take a look around – perhaps you can find your way up to the wheel, and help me steer out to the Seven Seas in search of the hidden treasure. Check the situation from the lookout barrel, or clamber up to the ship's upper deck and scan the horizon for land. Only an inquisitive and imaginative sailor will find the captain's key for the treasure chest and the hidden diamonds on board.

If you explore the captain's cabin, you'll find the treasure map and compass that will give you a clue to the whereabouts of treasure island. Down in the bowels of the ship are all the prisoners – watch out! Perhaps you'll end up walking the wobbly plank, and fall into the jaws of the hungry crocodile ... Yes, life on board LEDON's pirate ships is a vivid tale packed with play and imagination ...

Why choose LEDON Pirates?

-  All activities are inspired by children's pirate-related play and fantasies.
-  The pirate ships are packed with themed play activities that require minimal space.
-  The pirate ship's zones allow several age groups to play at the same time – without treading on each other's toes.
-  Many innovative play activities which stimulate both role, social and physical play, for example the wobbly plank.
-  The pirate ships are available in many different sizes and price ranges. Can be expanded with treasure islands and suspension bridges.

Welcome to the world
of the adventurous

What's lurking around the corner?

No human has set foot in this jungle before. Monkeys screech and swing from the vines, while lions and snakes lie in wait in the dense undergrowth. The explorers have to keep their eyes and ears open, and exercise extreme caution with every step. But discoveries don't just happen – so it's time to buckle up and move further into the wilderness. Exciting worlds take shape in children's imagination when they are having fun in a play environment from LEDON's Explore series. The wide range of play equipment in the series can, when combined, create the perfect Explore universe for your playground.

Welcome to the world of LEDON Explore – are you ready to embark on a journey of discovery?

Why choose LEDON Explore?

-  Low-maintenance play equipment in natural colours.
-  Popular in green areas where a natural-looking playground is desired.
-  The largest themed play system with play equipment in all price ranges.
-  Challenges and stimulates children's natural development, especially their physical, motor, cognitive and social skills.
-  A themed play system that arouses children's natural interest in experiencing and exploring the world.

LEDON[®] CASTLE

Tall towers, escape-proof dungeons, proud knights and beautiful princesses. In the knights' castle, there is always much at stake – treasures must be found and defended in both good times and bad.

The knight's shield gleams among the ruby-coloured roofs, while torches cast colourful shadows across the suspension bridge. It takes courage, strength and, above all, an element of shrewdness to move around a castle like this! You must always stay alert – has a burglar swung across the moat and sneaked in through an open basement window, or has a rival run off with the beautiful princess?

Everyone wants the key to the treasure chest, but getting there is pitted with countless challenges as you balance, climb and make your way through the dark passages. If you put a single step wrong, you risk being thrown into the dungeon, where you will be chained up forever.

There is always a battle to fight, a land to conquer – and the heart of a beautiful princess to be won.

Mount your steed – and off and away you go!

Why choose LEDON Castle?

-  The Castle universe supports role-play for both princesses and princes, especially within: social rules, negotiating and understanding the social hierarchy.
-  Eye-catching play systems that spark the curiosity and interest of children and adults alike.
-  A firm favourite with many children when they are allowed to choose which playground they want.
-  Innovative play activities that stimulate role, social and physical play, such as the roofs which cast coloured patches of light onto the ground.

High-quality and keenly priced play equipment

LEDON Basic gives you all the standard play equipment you need to create affordable, low-maintenance playgrounds.

With its urban and timeless design, LEDON Basic is suitable for urban spaces, housing associations and childcare institutions. In designing the series, one particular focus area was supporting the key elements of children's physical and motor development in the 2-12-year-old age group.

What about quality?

We can confidently say that LEDON Basic is built to the same high quality as LEDON's other series as we have used the same materials. Likewise, the series is also 100% recyclable and requires a minimum of maintenance.

To keep prices as competitive as possible, we have refrained from painting the posts, we have reduced the number of play activities with moving parts, while the floor sections and seats are smaller than those on LEDON's themed playground equipment. In this way, internal processes and materials consumption have been significantly optimised.

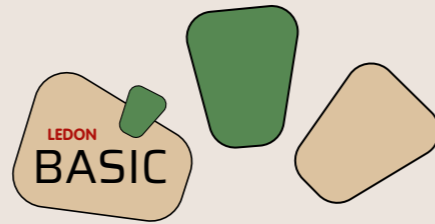

Why choose LEDON Basic?

-  All the basics needed for a good-quality low-priced playground.
-  Compact towers that require a minimum of space.
-  The systems are available in a wide range of variants for meeting any need.
-  Providing basic motor challenges is paramount – even for older children.
-  Can be easily integrated into both existing play environments or combined with LEDON's other themed play systems.

Decades of originals and favourites

LEDON Originals pays homage to the favourite items of playground equipment which have been bestsellers for decades. Everything you know well from the playground and which is still a must when children are having fun.

Much of the LEDON Originals equipment is designed and developed by LEDON's founder Leo Donbæk. Leo's passion for children's development and quality play is the cornerstone of the LEDON we know today, and therefore many of the Originals are still a hit. This is very much the case, for example, for the well-known red spring horse which was first designed in 1987 as one of LEDON's first springers.

Why choose LEDON Originals?

- ♥ Favourites which have proven their worth in the playground for generations.
- ♥ Play equipment that can increase the play value of existing playgrounds.
- ♥ Everything you need for the playground: Swings, sandboxes, merry-go-rounds, trampolines and much more.

“ My passion has always been developing good-quality play equipment that supports children's development.

Leo Donbæk
Founder of LEDON in 1969.
